# Globecomm VSAT
## A Robust and Flexible Communication Network

## The **Most Reliable** VSAT Solution on the Market

Globecomm provides fully managed voice and data communication networks that meet the increasing demands of the maritime, government and enterprise markets. Globecomm VSAT is a high-performance service providing a broad range of narrowband and high-throughput applications over a robust, flexible and scalable network.

**GLOBECOMM**®

## Globecomm VSAT Key Benefits

- Our network offers standard connection plans that are fully flexible and scalable—from a full range of shared services to fully private networks for land, maritime and aeronautical customers.

- Higher availability and network uptime on the industry-leading platform which incorporates the latest coding technology.

- A smoother, more efficient internet experience as a result of built-in TCP and HTTP acceleration.

- An upgrade path to next generation High Throughput Satellite (HTS) services as end user applications demand higher bandwidth.

- Worldwide portable bandwidth for mobility users, and secure, robust terrestrial fiber connectivity, offered as part of Globecomm's state-of-the-art global VSAT network.

- End to end managed VSAT service built, managed, and supported by one service provider, Globecomm.

*Available from June 1, 2016*
