

Slap'n TrackSM Devices

Satellite-Based Asset Tracking for IoT Solutions

Globecomm's **"Always-On"** Connection

Globecomm's Slap'n Track is vital to any company with expensive capital assets in the field that has ever experienced a misplacement or an inability to locate large assets of value anywhere on earth.

Slap'n Track devices use a simplex satellite solution to ensure connectivity in cases where cellular network coverage is not available. The devices can send data over the reliable, always on satellite connection. The best solution to track expensive hardware often needed in energy exploration.

The Slap'n Track devices are designed for operation in rugged markets such as trucking, heavy equipment, oil and gas. The devices include an internal GPS, accelerometer and standard interfaces such as Bluetooth, serial ports and discrete input/outputs. Out-of-box the devices support fleet management applications such as logistics, sensor telemetry and GPS tracking. The devices can be customized to meet specific application requirements.

Slap'n TrackSM Devices For Iot Solutions

	GeoForce GT1	SmartOne Solar	SmartOne C
Bus Interfaces	-	Serial (TTL)	Serial (TTL)
Internal Features	Embedded GPS, Battery, Bluetooth Beacon ID	Embedded GPS, Solar Panel, Battery, BLE, Accelerometer	Embedded GPS, Accelerometer
Programmability	Scheduled/Interval Reporting, Time Interval Based Reporting Vibration Based Motion Reporting GPS Based Motion Reporting	Time Based Reporting, Motion Based Reporting	Time Based Reporting, Motion Based Reporting
Temperature	-40c to +85C	-40C to +85C	-40C to +85C
Power	Battery Powered up to 9 years	10 to 48 VDC	5VDC or 9 to 22 VDC
Ingress Protection	IP 68 / IP69K	IP 69K	IP 68
Certifications	CE, FCC, ATEX, IECEx, OSHA, RoHS	FCC, ISED, CE, ANATEL, ATEX, IECEx	FCC, CE, IC, Anatel, RoHS, COFETEL

Globalstar Satellite Network

Message Size (from device)	54 bytes
Message Size (to device)	-
Coverage	Simplex, Global, low earth orbiting satellites
Latency (typical)	Within 20 minutes
